## Skills Update

1. Add. Write the answer in simplest form.

$$\frac{3}{9} + \frac{9}{18}$$

2. List all of the factors of the number.

42

3. Complete the number sentence to make it true.

$$(16 \underline{\quad} 3) \div (7 + 3) = 4.8$$

4. Read and solve.

I am a number. If you add me to 94, the sum is 200. What am I?

5. For each problem, find the product.

- a.  $80 \times 70$
- b.  $800 \times 70$
- c.  $8000 \times 70$

6. Divide and check.

$$2104 \div 35$$
